Re: Voice Path Convergence Group

I am pleased to write this letter in regard to the exceptional product and service that we received from Voice Path Convergence Group when we made the decision to move forward with the installation of a new telephone system for the Whitby Chamber of Commerce.

Our telephone system was out of date and no longer met our needs. I was extremely impressed with the attention to detail during the preliminary meetings that were held by Voice Path as the current and future needs of the Chamber were assessed as well as during the planning stages for installation.

The integrated telephone system is excellent and has the ability to grow with us as we grow. The technology is impressive. We now have a streamlined master panel which accommodates our telephone system components and it has become the 'master hub' for communications.

The professional attention that has been shown to us by the staff and management of Voice Path is first class as was the training that we received as to how best to take advantage of all of the abilities of our new system. We have the expertise and support of a local company who supplies, installs and services a top quality telecommunications product.. It is my pleasure to provide this letter of recommendation for Voice Path Convergence Group.
