IP Softphone

KX-NCS8100

Bring Your Distributed Offices Closer Together with the Ease of IP

Now you can connect your headquarters, branch offices and off-site staff to a single Hybrid IP-PBX in your main office with the ease of Internet Protocol (IP). Only one central Hybrid IP-PBX is needed, which means you can administer and manage telephone communications between all your offices simply and efficiently. And save on expensive telephone wiring – your IP telephones connect to your existing local area network standard (LAN) cables. With IP Softphone, you can contact other members of your staff even when you are not at your desk. It gives you great mobility.

IP Softphone - KX-NCS8100 (IP Proprietary Telephone in PC)

IP Softphone: Versatile and Efficient

Mobility

Enjoy smooth communications through your PC with virtually the same level of functions that you would have if you had brought your office phone with you.

Low Cost

There's no need for an off-site PBX or traditional telephone wiring.

Transparent Integration

You can administer and operate IP telephones just like other extension telephones.

Flexibility

IP technology lets you send data and voice over the same line.

Message/Ringer Lamp (Dual Colour)

User-friendly Display

Ping Level Display

Dial Paste

Record

Time-Saving, Easy-to-Use Navigator Key

Programmable Keys with Red/Green LED

► User-friendly Display

The display gives visual feedback that makes it easier to handle calls and perform other tasks. Use the display to view various kinds of information or to access the features of your Hybrid IP-PBX.

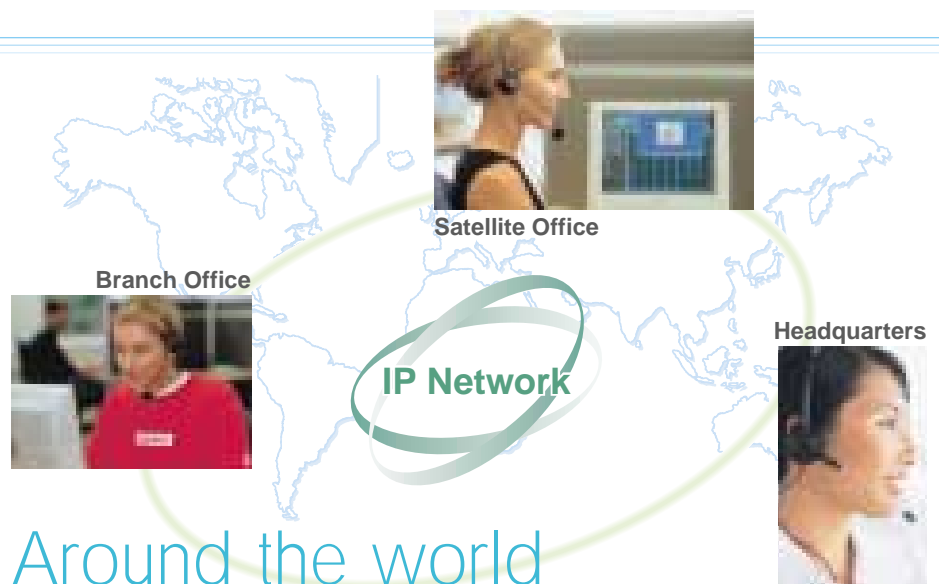

► Programmable Keys with Red/Green LED

Extension users can customise their telephones to provide quick access to outside lines, other extensions, or commonly used PBX features, such as Call Forward (FWD), Do Not Disturb (DND), and Conference. Each lamp has a dual-colour LED that shows the line status, extension status, and other related information.

Application Examples

- Allows your employees to access the full functionality of your office telephone extension anywhere, anytime
- Staff can work remotely, efficiently & transparently
- Your business can also benefit from greater organisational flexibility

Around the world

For example, communicate with colleagues around the world with low cost and high efficiency.

In home offices

For example, gain the same kind of benefits as if you had your own call centre right in your office at home.

► Message/Ringer Lamp (Dual Colour)

The Message/Ringer Lamp illuminates green to indicate when a call comes in and lights up as red to indicate when a message has been received.

► Ping Level Display

Displays the IP Network Status between the IP Softphone and the PBX to provide visual indication to user.

► Dial Paste

Simply copy telephone numbers from Microsoft Outlook, Excel, or other applications, and paste them into IP Softphone for quick and easy dialling.

► Time-Saving, Easy-to-Use Navigator Key

The intuitive Navigator Key helps extension users quickly select and control various features, including commonly used settings like ringer and speaker volume.

► Record

Record conversations directly onto your PC (including networked PC's), reducing the need for a separate voice mail. The sound file can be emailed to colleagues that were not present during the conversation. This function can also be applied to call centres where recording for security and training purposes are essential.

System Overview

Softphone Specifications

Alphanumeric Display (LCD)	6 lines x 24 characters
