

Product Brief

Panasonic Integrated Office Solutions

The Panasonic VoIP PBX systems are designed to be modular, expandable and flexible in both technology and the business application solutions. Equipped with network based communication applications that, when enabled, provide return on investment and peace of mind. A future proof design and open standards based architecture means that customers can be assured that their investments are protected now and well into the future.

Highly modular and designed to improve your business communication workflow the Panasonic PBX platforms are ideal communication systems that solve many of your business communication needs today. With intelligent call routing and call centre functionality, together with integral desktop productivity applications, the Panasonic platform enable businesses to effectively reach, serve, and retain your customers. The Panasonic PBX system are packed with features and applications that can enhance your business productivity.

Proprietary Telephones for an easy touch

The TDE and NCP Telecommunications Platforms support the DT and NT300 Series of digital and IP telephones that are stylish, intuitive, user friendly, and comfortable to use by all system telephone users. Panasonics business telephones take you to a new dimension in audio quality, communications productivity, broadband network connectivity and customer care. These desktop telephones bring you the power of the advanced TDE and NCP IP PBX systems - allowing quick access to the entire spectrum of the PBXs additional features and applications.

Panasonic Wireless Mobility

Today's companies need to keep their employees fully accessible throughout the day. Panasonic Wireless DECT connectivity does exactly that. It also increases customer loyalty, reduces work time and accelerates response. With the Wireless XDP, you can set your wireless telephone to have the same extension as your desk telephone, and then receive calls even when away from the desk. You're always there, ready to receive your customers' calls, and make the most of every business opportunity that comes along.

A handset for every challenge

The Panasonic KX-TD7695 DECT handset combines small size and light weight with a host of powerful features. The KX-TD7685 is a good choice for users who want good basic performance at a lower cost. And the KX-TD7696 is the tough solution for harsh work environments.

Never miss a call with TVM Voice Mail

The human voice is still the best way to communicate. Panasonic offers two feature packed voice processing systems designed for efficient communication. The KX-TVM50 and KX-TVM200 offer automated attendant, automatic call routing, and email message notification, each of which can be customized to your individual needs. And the best, no licensing is required for users to activate their mailbox incl. the features above.
